Using store data via LocalStorage from Login Page

Lim Teng Chwee

m111 <Admin>

LOG OUT

Grabs stored data via LocalStorage Login page. The box informs who is logged in. Admin user CAN add/edit/delete while a user can only add & edit.

```
document.getElementById("showMemberName").innerHTML = localStorage.getItem("namevalue");
document.getElementById("showMemberID").innerHTML = localStorage.getItem("idvalue");
document.getElementById("showMemberRole").innerHTML = localStorage.getItem("rolevalue");
```

Using store data via LocalStorage from Login Page

Grabs stored data via LocalStorage Login page. The box informs who is logged in. Admin user CAN add/edit/delete while a user can only add & edit.

Instructions to users

- 1 Important: Always add your EFMAS User ID to add new items.
- 2 You are only allowed to edit and save items under your User ID.
- 3 You can transfer your existing case to another User ID. Once transferred, you cannot edit the transferred case.
- 4 If you click to edit other users' data, the edit button on that row will be disabled. Please refresh the page to reset the database.
- 5 You cannot add an empty row. Please add your EFMAS User ID to proceed.
- 6 Reminder: Always add your EFMAS user ID when adding new items.

CLEAR FIELD FORM

Update
